# CRIME MAP !

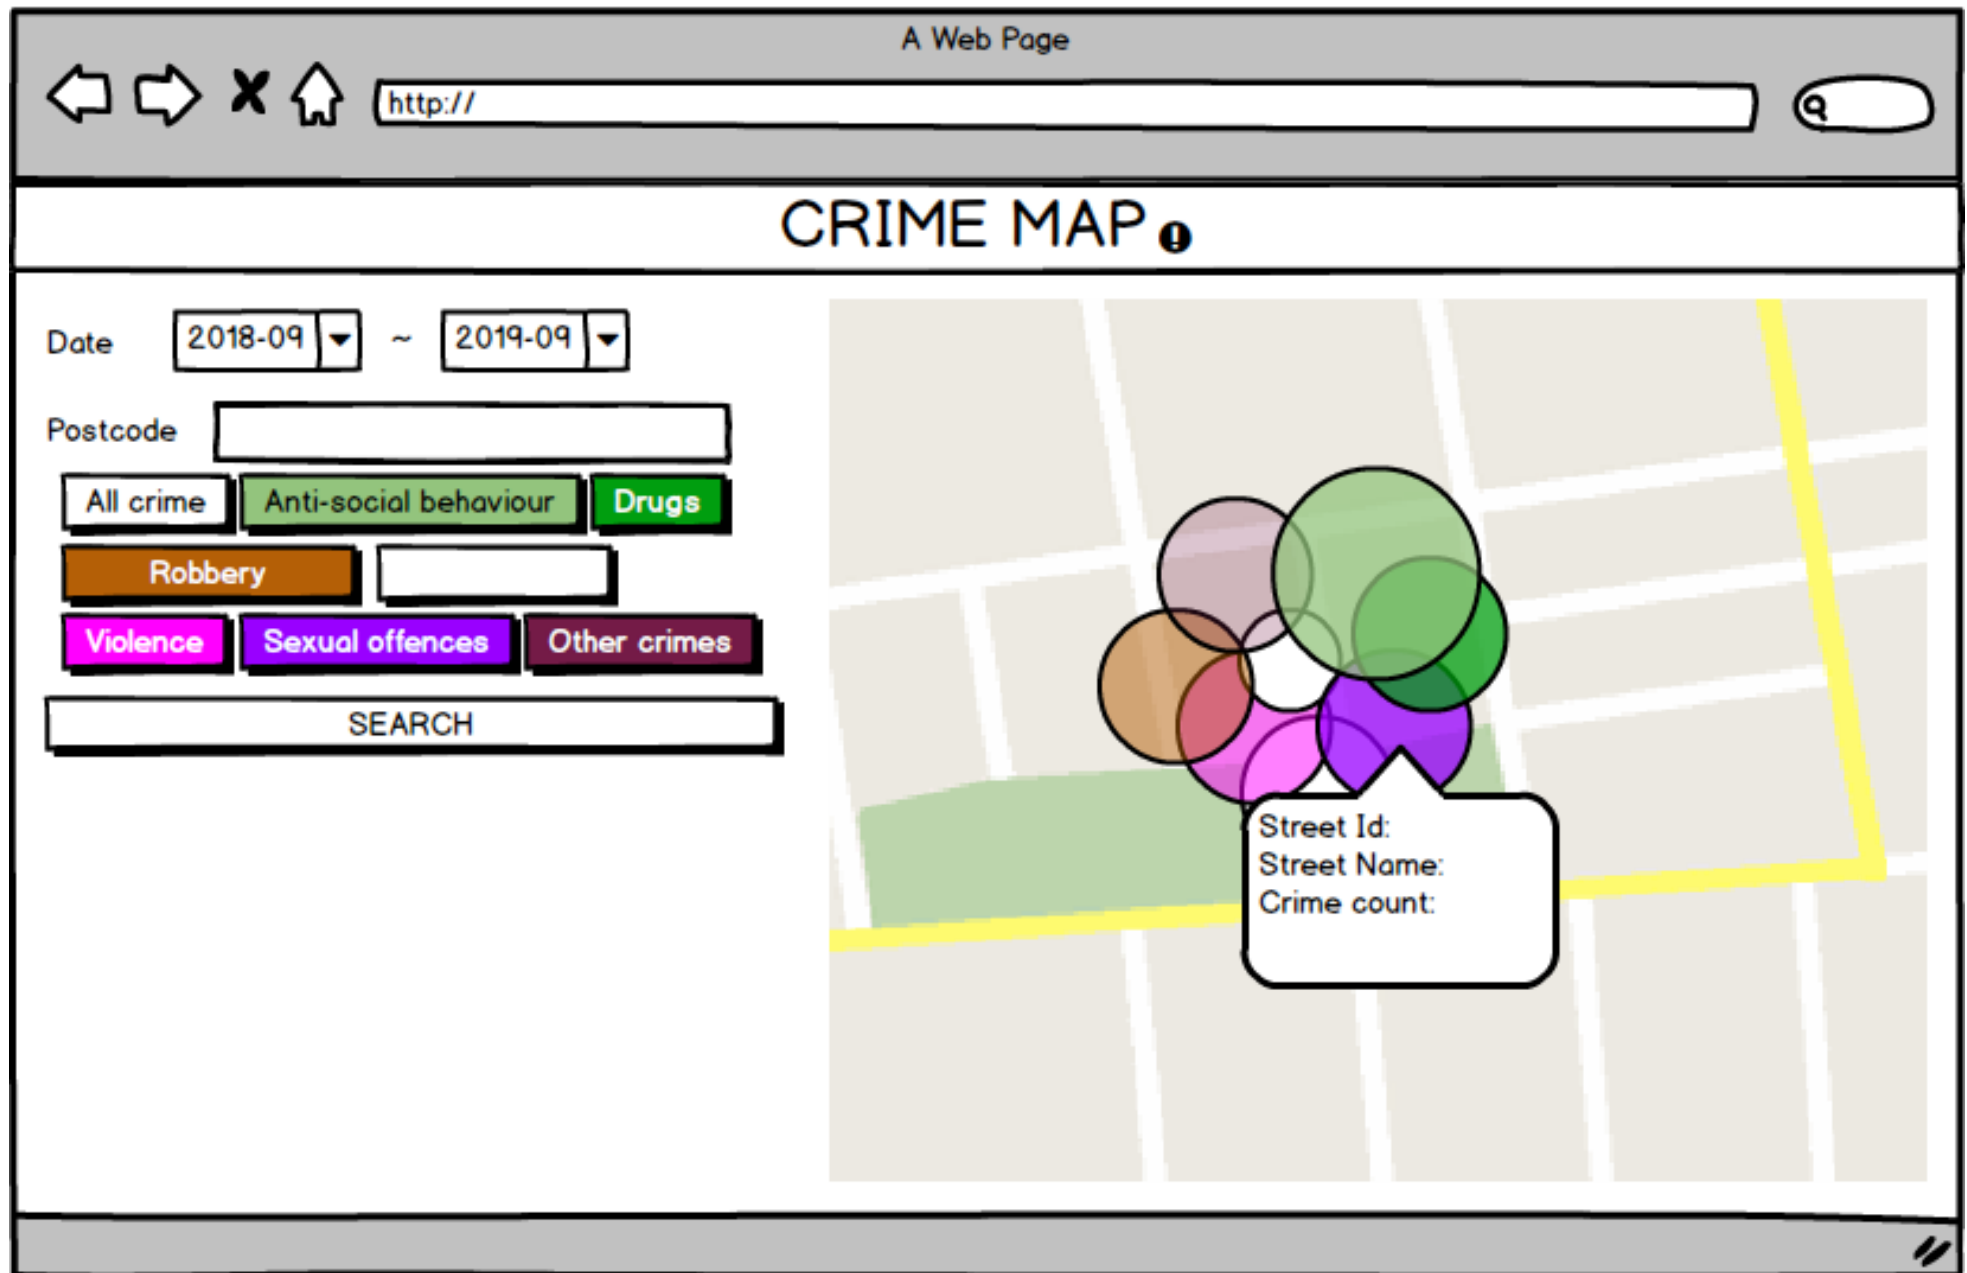

Date  ~

Postcode

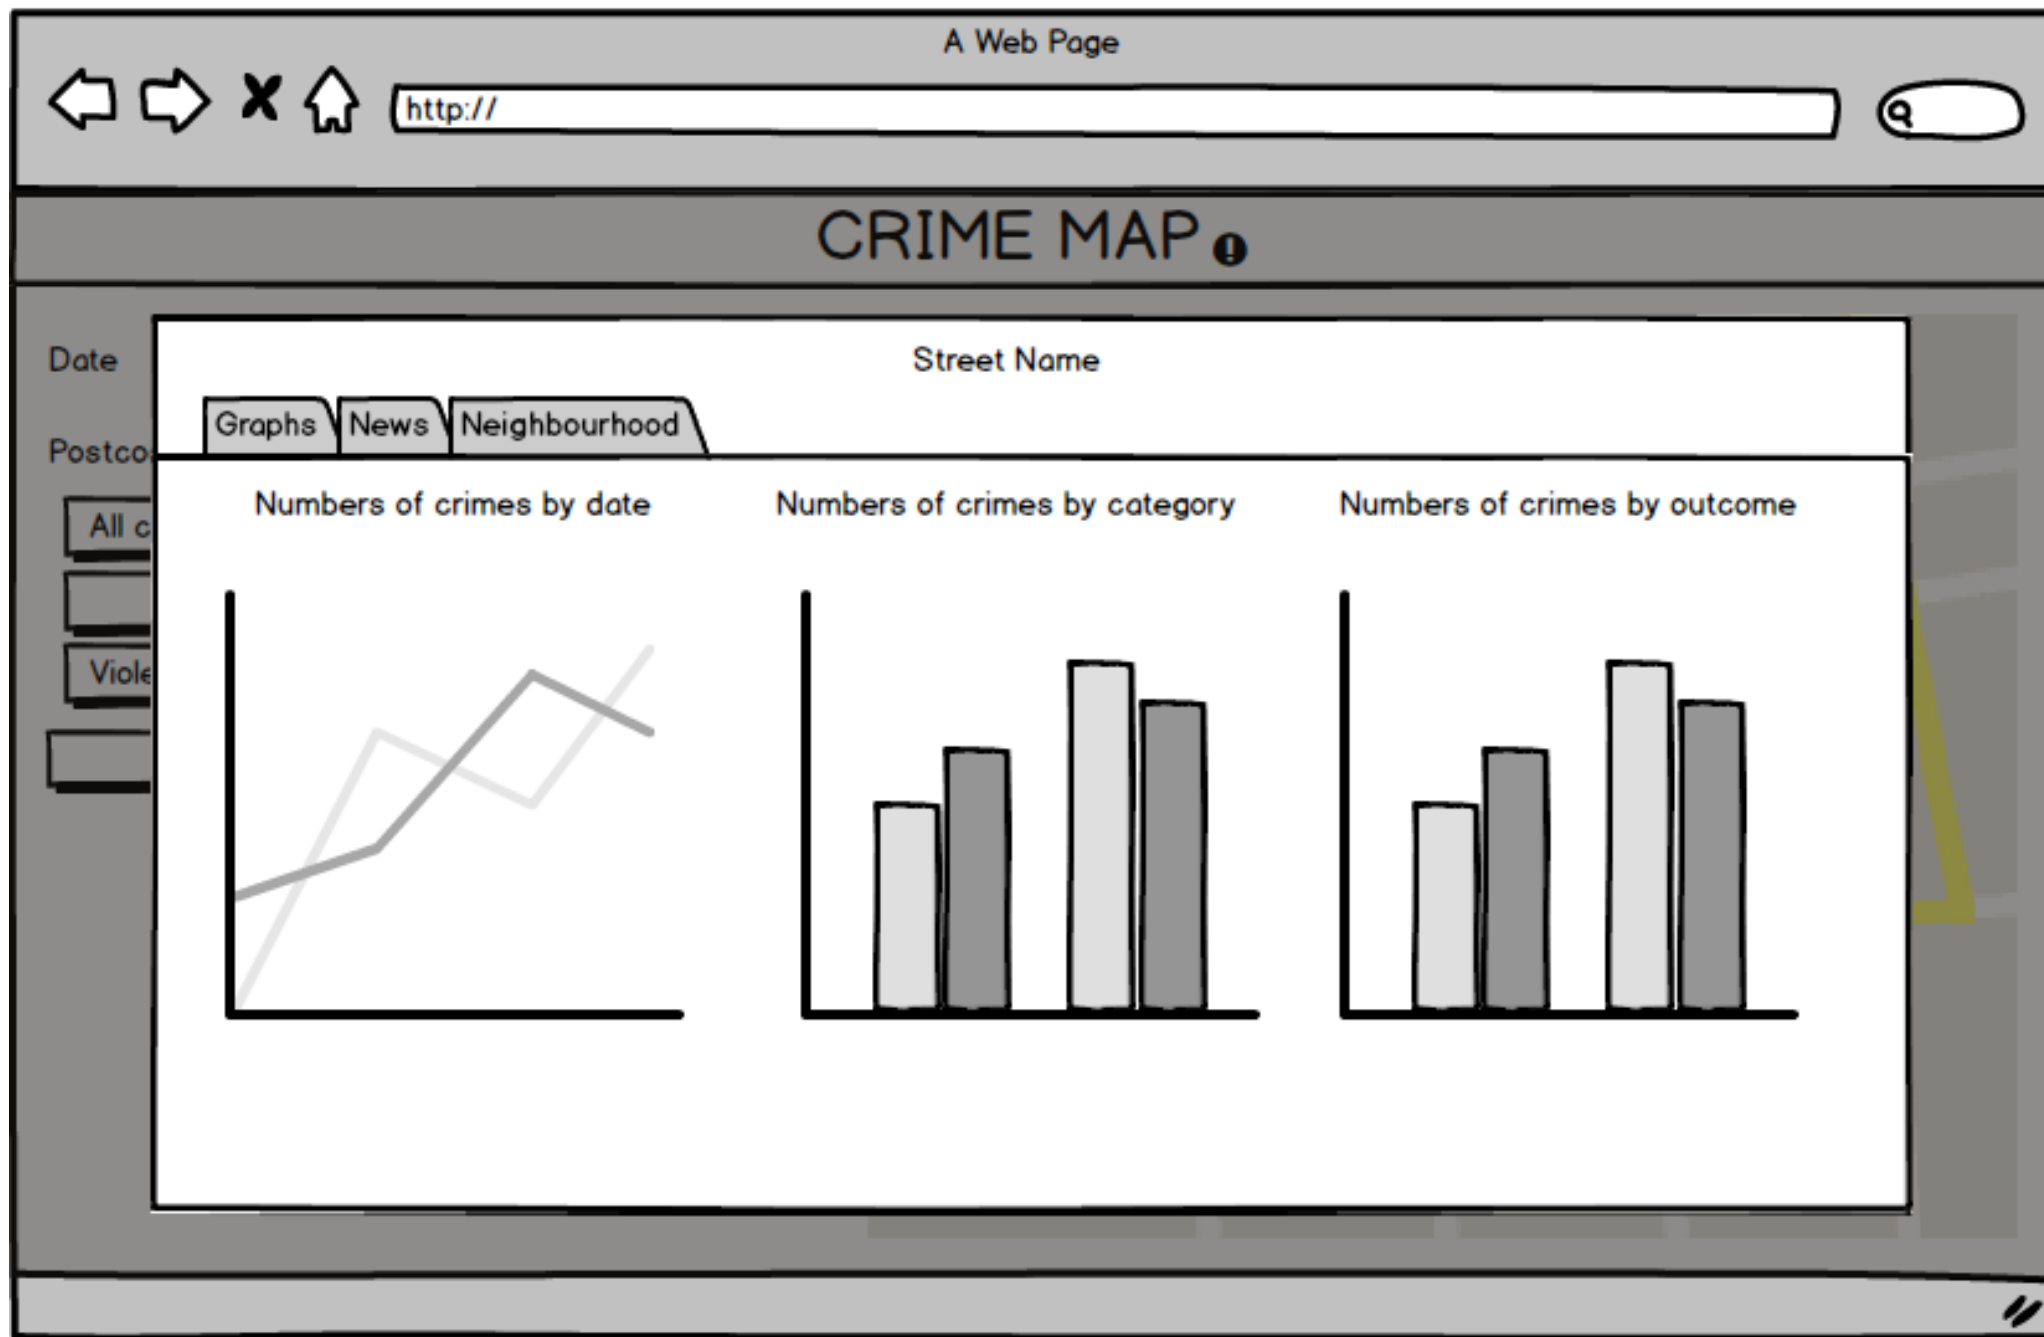

the information on this site

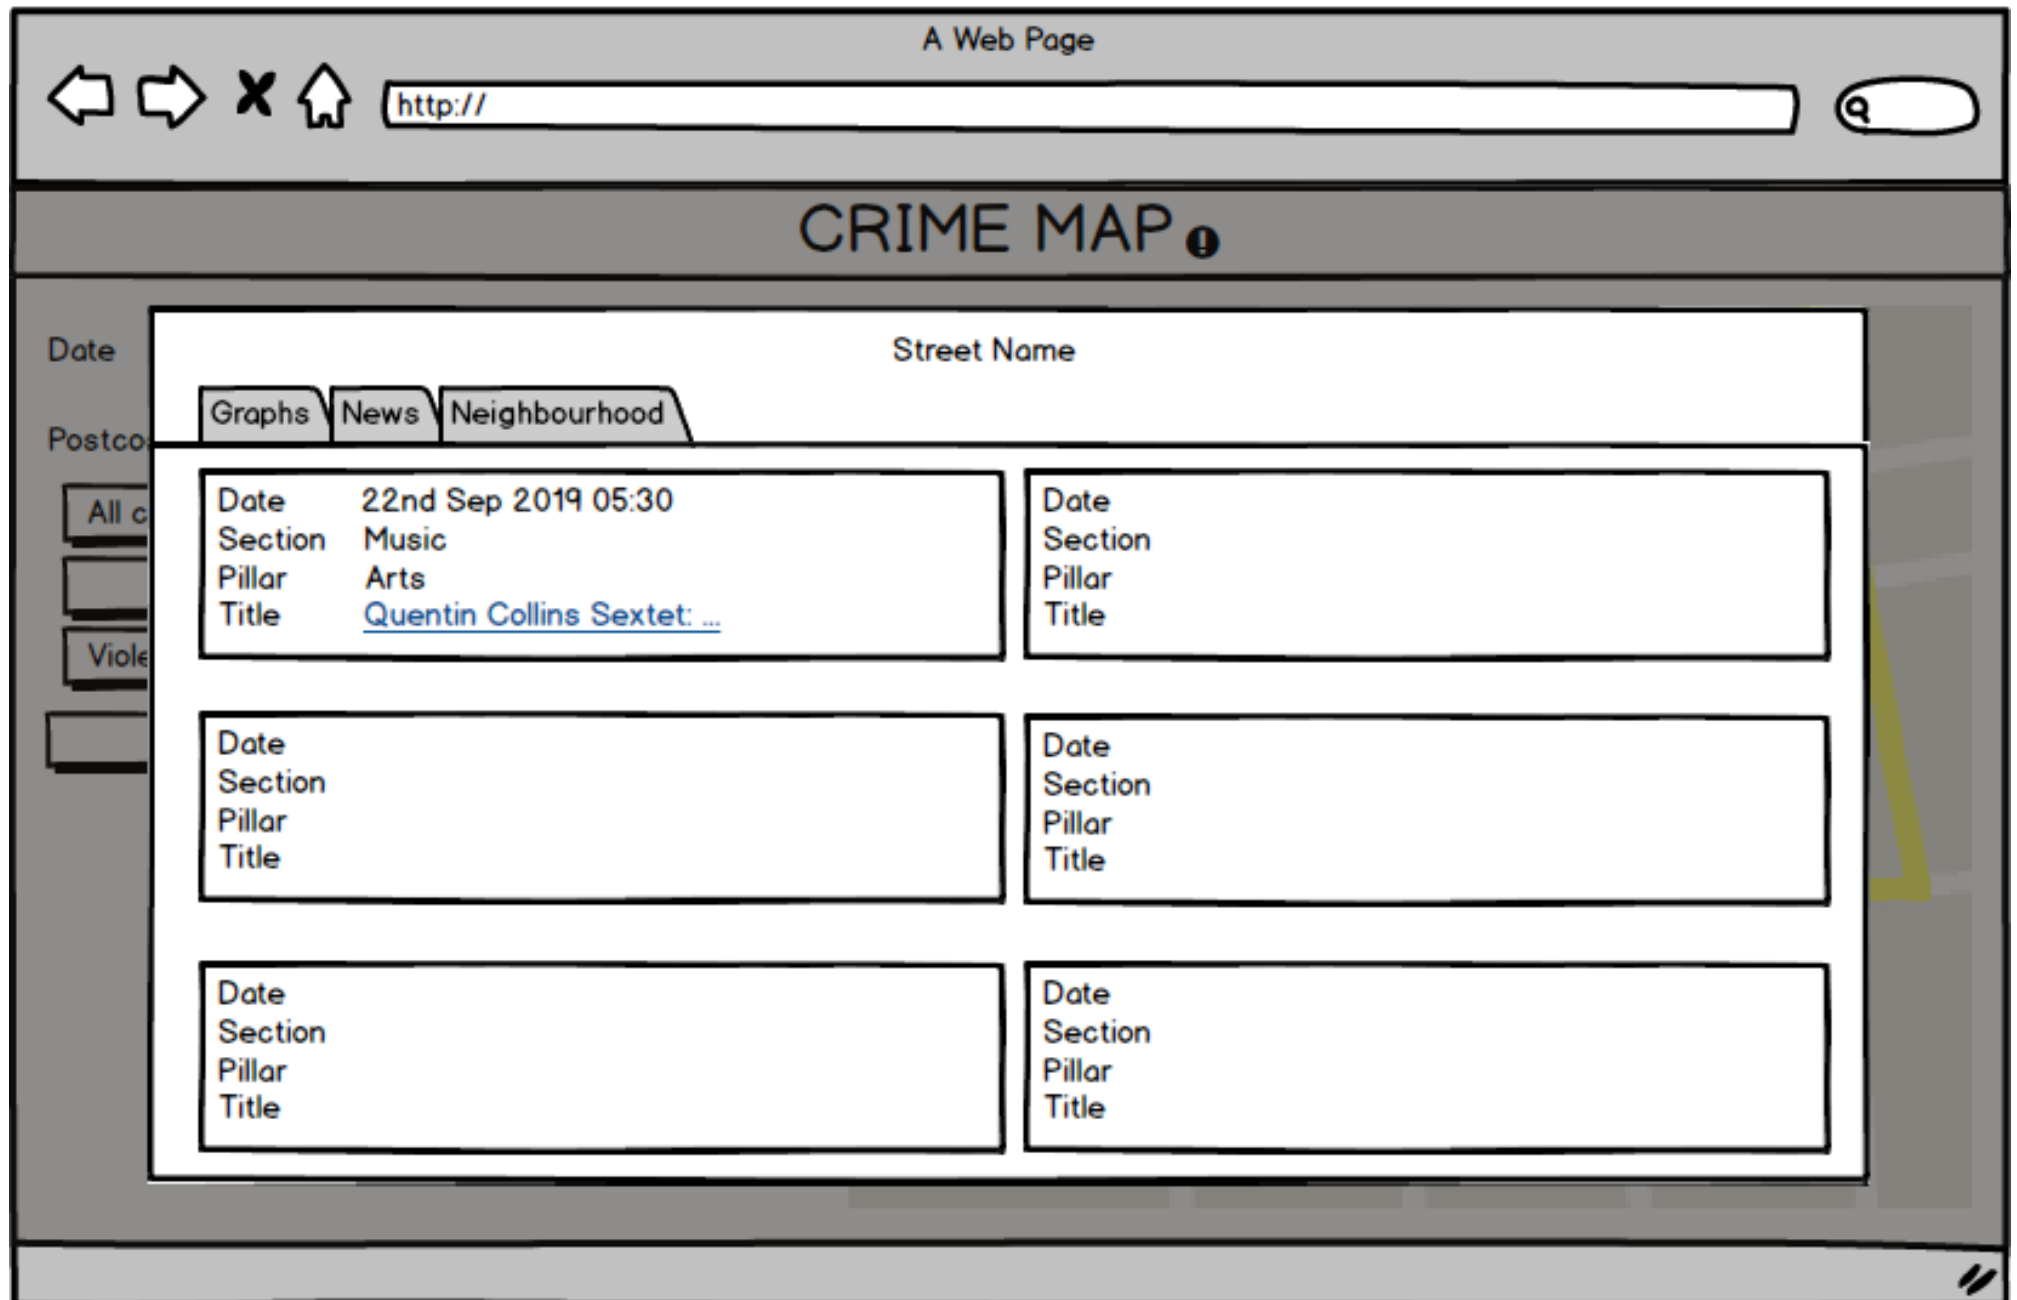

Shows search form and map for each side; date, postcode, crime categories and search button on the left side and a map on the right side. Once exclamation mark is clicked, the information on the site is shown. If a user doesn't input postcode, GPS will catch the current location of the user.

## After search

Shows results on the map after searching with dates and postcode. Circles are categorised by how many each crime happened. A user can choose crimes which s/he wants to see multiply by clicking buttons such as 'Drugs'. The modal which shows an analysis would be displayed if a user clicked the circle.

Second tab in the modal. Shows news which retrieved from Gaudian and sorted by latest date. Each news would show title, pillar, section and date. A user can click title to read the news.
